# Setting up **Web Zones**
~designed to grant or restrict online student access for a set time period.

For example "Current Events" has rules defined to allow students to upload videos to you tube. "Government" has rules defined to keep students from going anywhere online during a Moodle test.

4. Establish "Rules" for your Zone ~granting or restricting access.

Setting up **Web Zones**

~designed to grant or restrict online student access for a set time period.
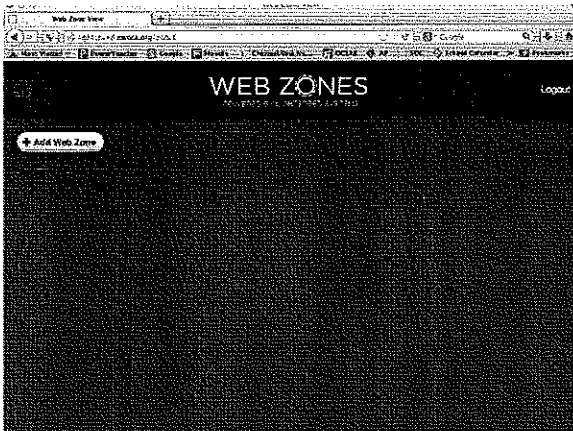

1. Teacher Access:

Lightspeed.nwoca.org/zones

Log in using your standard username/password

2. Click on "Add Web Zone"

3. Enter the "Name" for your Web Zone. Description is optional.
Name your Zone based on why you are creating it.
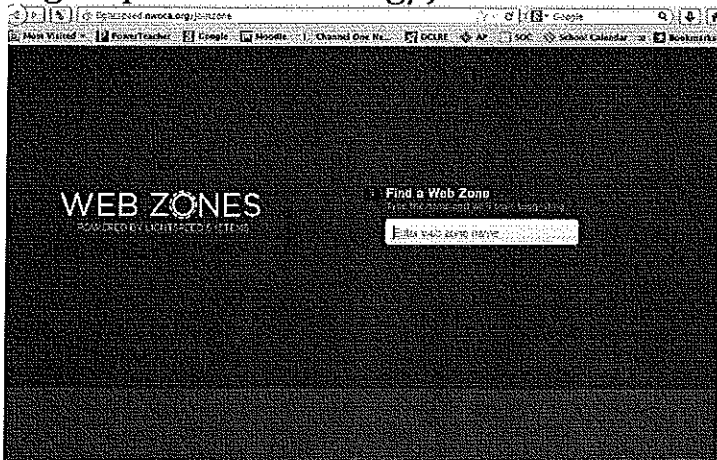

Using **Web Zones**
~designed to grant or restrict online student access for a set time period.

1. Activate your Web Zone for the time you specify (2hours or less)

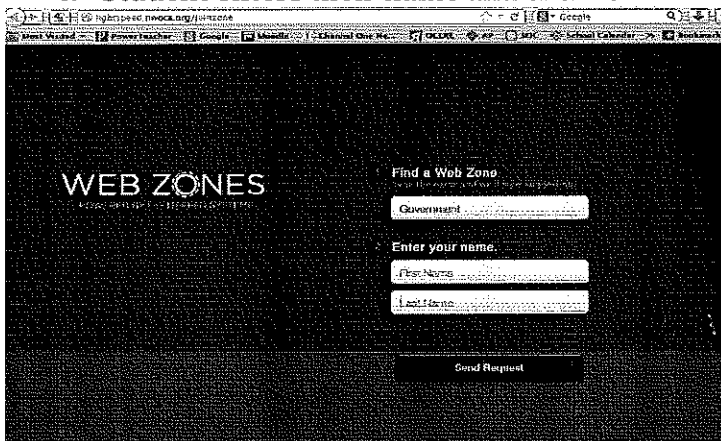

2. Student Access:
Lightspeed.nwoca.org/joinzone

3. Student searches for your Web Zone by typing in the title.

Using **Web Zones**
~designed to grant or restrict online student access for a set time period.

4. Student enters their name and click "Send Request".

5. Teacher will then see students on their computer in the "Join Requests" column. Click to accept them.

6. When finished "Release" members and close your Web Zone by clicking the stop button.
