Frequently Asked Questions

Click to expand...

✓ [When will we be switching to Lightspeed?](#)

The installation of the filtering boxes will start the week of August 13th. We have a couple districts that will be a part of the pilot program to help us get the initial configuration and settings put in place. After that we will be opening it up to other districts that would like to switchover. We will ask all districts to move over by the end of the 2012-2013 school year.

✓ [How do I get to the LightSpeed interface?](#)

You can get to the interface by going to <http://lightspeed.nwoca.org> . You can use your M86 IP credentials to access the page. If you do not have your credentials, please send an email to mail_staff_hw@nwoca.org and we will get you the information.

✓ [How will we get training?](#)

Training materials will be provided within the next couple weeks. When you are ready to switch over, NWOCA will provide web training to get you familiar with the features of the system and to setup your filtering policies.

✓ [Who will handle ongoing support?](#)

NWOCA will facilitate all support requests. However, Lightspeed will be providing 24/7 support by going to [LightSpeed wiki](#) for all technical issues. You will need to create a username and password to get access to this resource.

✓ [How do I get the client software?](#)

Did you sign up at wiki.lightspeed.com for a username/password yet? If not, you can sign up and it only takes a few minutes. Then you can get all of the downloads and information you need to set up the clients at:

<http://wiki.lightspeedsystems.com/display/ALLDOCS/Software+Downloads++Q10019>

Go to the tabs Client Agents >> User Agent (UA) where you will find the software downloads. Then just follow the directions in the Documentation section, using the ip 10.247.248.70 when asked for the source.

Features

Web Filtering

- CIPA-complaint, education based database with granular and customizable policies
- Filter based on IP address, subnets or LDAP integration
- Daily URL database updates
- Web zones allow for custom access based on time (class period)
- Comprehensive reporting features
- More information at: <http://www.lightspeedsystems.com/products/Web-Filter.aspx>
- [Datasheet \(PDF\)](#)

Mobile Filtering

- Compatibility with all major platforms including Windows, Mac, iOS, Android, and others
- Time-based policies
- Forced SafeSearch
- Comprehensive reporting features
- More information at: <http://www.lightspeedsystems.com/products/Mobile-Filter.aspx>
- [Quick Look \(PDF\)](#)
- [Datasheet \(PDF\)](#)
- [Datasheet for iOS & Android \(PDF\)](#)

My Big Campus LMS

- Cloud-hosted Learning Management System that integrates with your web filtering policies
- Educational Resource Library with thousands of videos, wikis, documents and websites
- Authenticated user access (LDAP)
- Unlimited accounts and file storage
- More information at: <http://www.mybigcampus.com/tour>
- [Quick Look \(PDF\)](#)
- [Datasheet \(PDF\)](#)

WebZones

This documentation was given to us from a district that is currently using WebZones with their teachers.
