    - [Launch AnyConnect](#)

## Cisco AnyConnect Installation Instructions

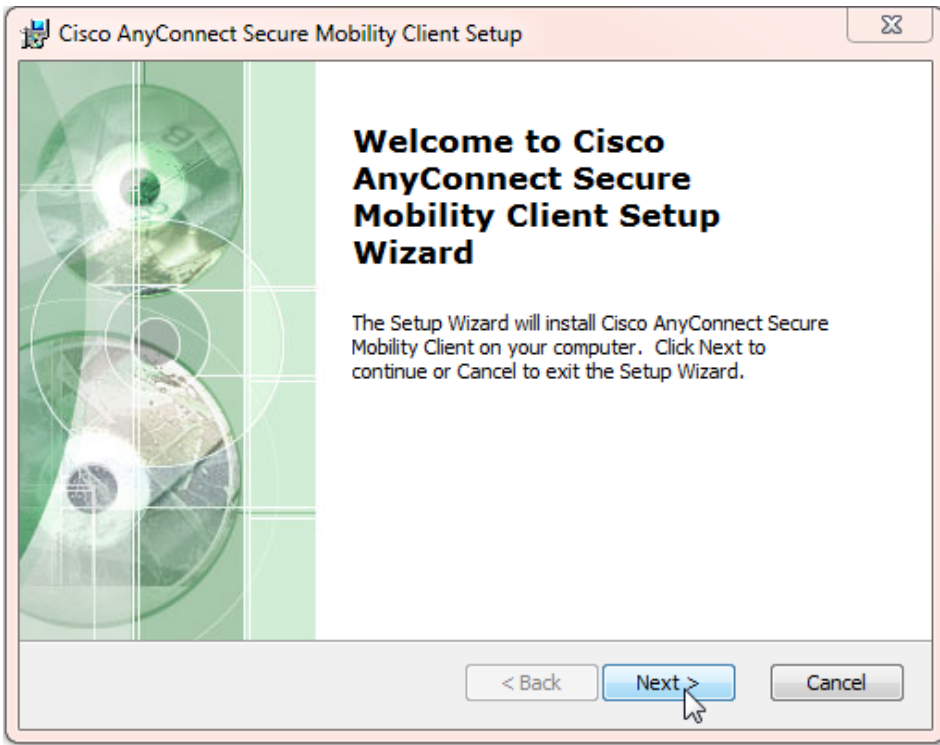

### Windows Installation

#### Install AnyConnect

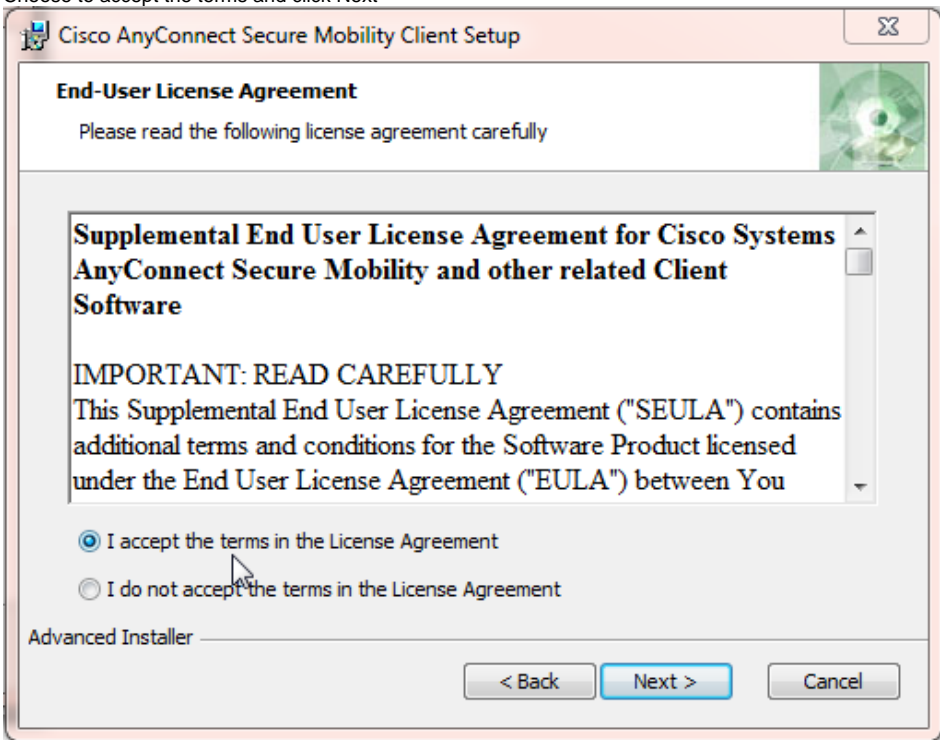

- Download the AnyConnect software here:
  - Windows: [anyconnect-win-4.7.03052-core-vpn-webdeploy-k9.exe](#)
  - Mac: [anyconnect-macos-4.5.05030-core-vpn-webdeploy-k9.dmg](#)
- Run the installer

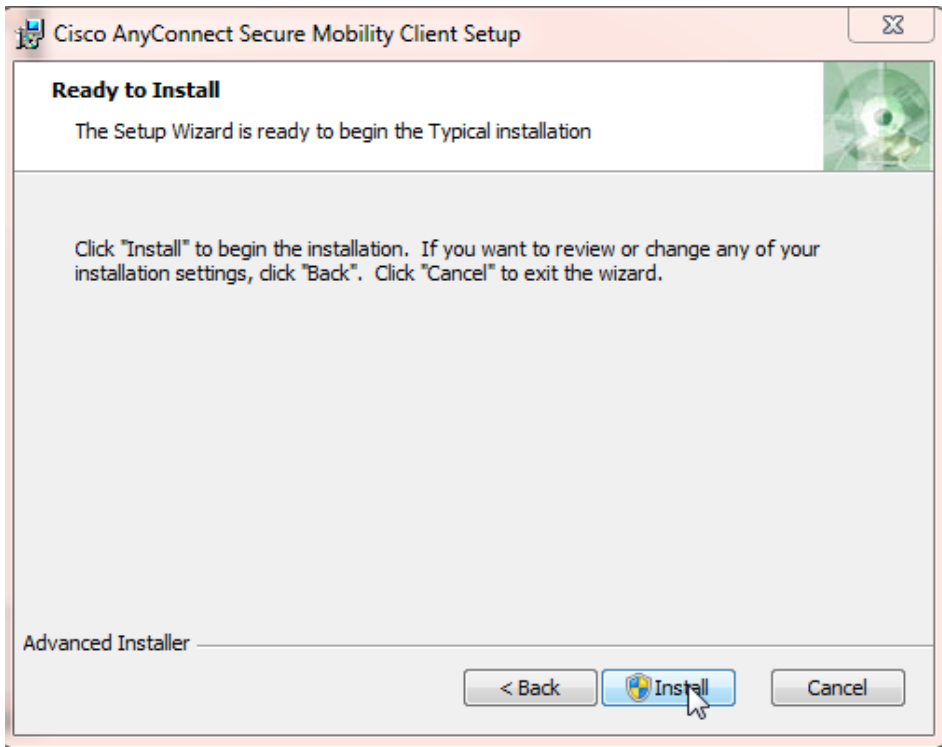

- 
- Click Next

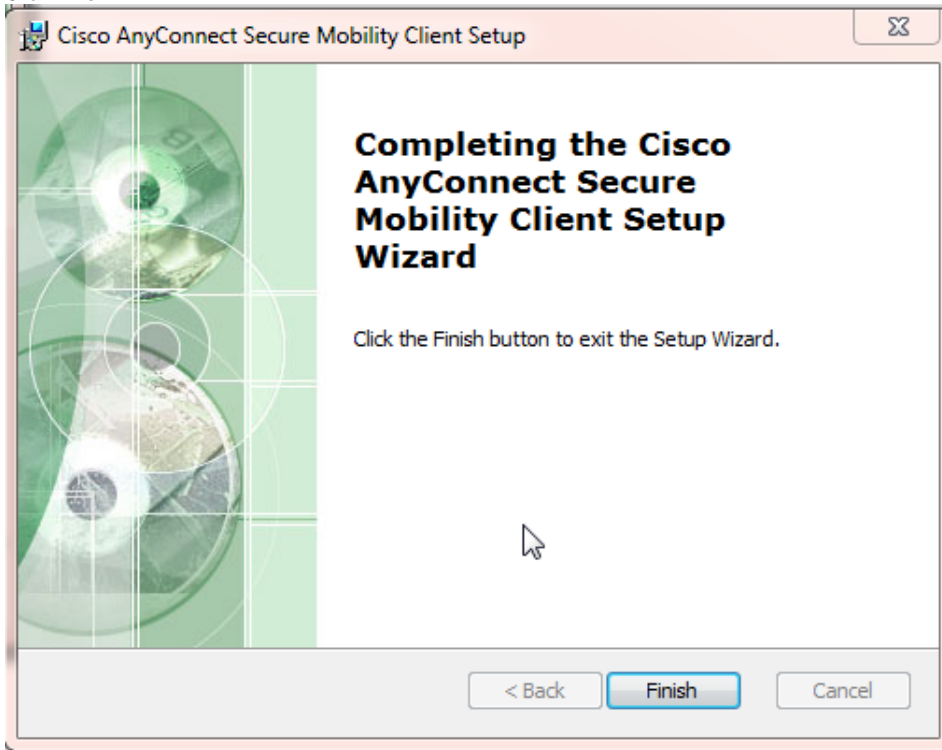

- 
- Choose to accept the terms and click Next

- 
- Click Install

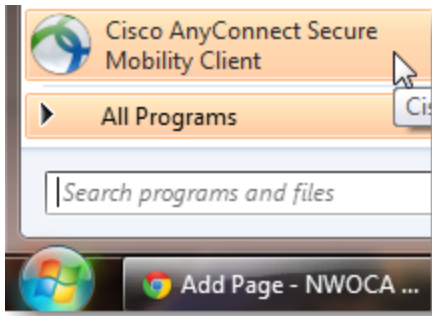

- 
- Click Finish

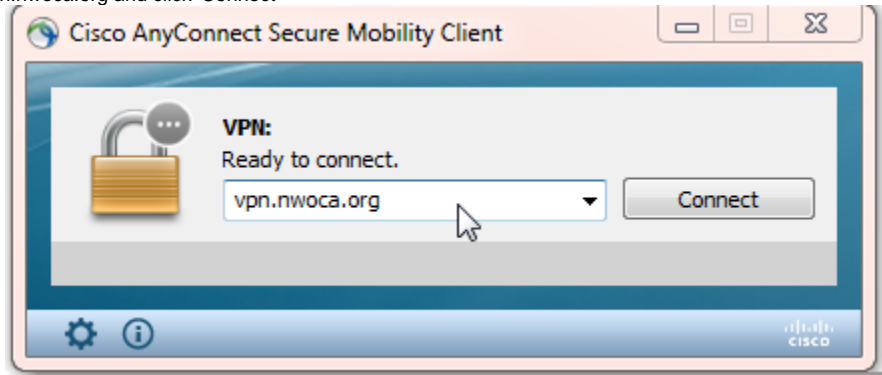

## Launch AnyConnect

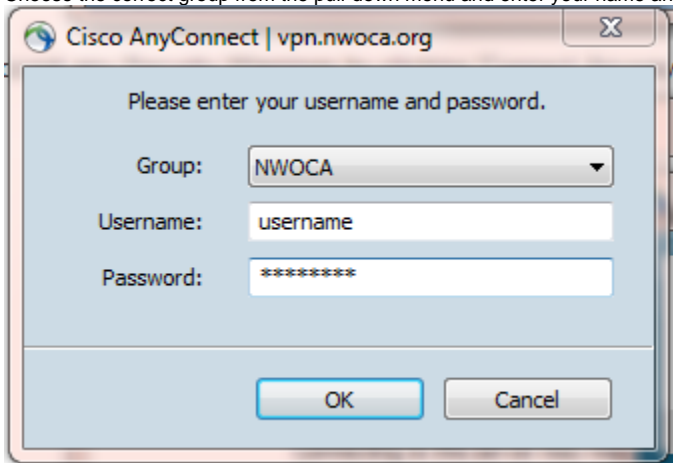

- Open AnyConnect from your Start Menu, after it is installed

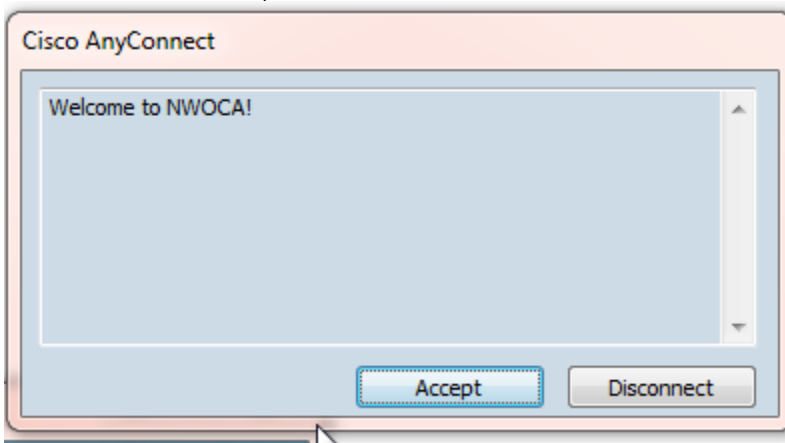

- Enter vpn.nwoca.org and click 'Connect'

- Choose the correct group from the pull-down menu and enter your name and password

- Click OK and choose to Accept

- You will receive a message in your task bar when connected

VPN Connected to [vpn.nwoca.org](https://vpn.nwoca.org)
