7. Click on the 'Accruals' tab.

- a. Uncheck the 'Decrease Encum Remaining' check box.
- b. Check the 'Accrue Leave' check box if you wish to accrue leave for the employee during the check run.
- c. Uncheck any of the remaining five check boxes for which you don't want this check to be accrued against.
 - i. If the check is for the current pay run just completed, leave all five of the other check boxes (current, MTD, QTD, YTD and FTD) checked.
 - ii. If the check is not for the current pay run, but is in the same month, uncheck the current box.
 - iii. If the check is for an earlier month in the same quarter, uncheck the current and MTD check boxes.
 - iv. If the check is for an earlier quarter in the same calendar year, uncheck the current, MTD and QTD check boxes.
 - v. If the check is not for the current calendar year, uncheck the YTD check box.
 - vi. If the check is not for the current fiscal year, uncheck the FTD check box.
- d. Click the green 'OK' button to calculate the pay.

16. Exit out of the manual check process.

 **FAM posting file and Batch Accounts Payable file**

The manual check process creates a FAM posting file and a batch accounts payable file. These files will be suffixed with an 'M' for manual checks. The FAM posting file will be named PMMDDYYM where MMDDYY is the ending date of the pay period. The batch accounts payable file will be named PAYXXXM where XXX is the pay run number

17. The FAM posting file must be posted using the same process you use when posting your normal payroll posting file. (FAM Periodic Routines Automated Payroll Interface)

Control Number	Pay Run	Description
P092017M	007	20171005RPR

18. The batch accounts payable file must be posted using the same process you use when posting your accounts payable file from a normal pay run. (FAM Entry&Processing Batch Accounts Payable)

Control Number	Entered By	Amount	Status	Year	Period
PAY007M		546.43	Entry	18	4

 **Include PAYXXXM control number when processing Vendor Checks**

The PAYXXXM accounts payable control number must be included when processing vendor checks for any payroll deduction checks run for any deductions withheld during the manual check run. The pipe symbol, |, should be used to separate multiple control numbers.
